# BACKGROUND INFORMATION

Indonesia has several cellular operators with around 65 million subscribers in 2007 and most of them have national license for their operations.

It is understood that cellular growth in Indonesia become higher in the last 5 years.

This condition is supported by the new telecommunication regulation UU Number 36 Year 1999 as well as positive signs in the economic sector as well as increase in demand for access to telecommunication services.

In order to take advantage of this potential growth PT JAPELKOM has already got contract from PT Exelcomindo Pratama, Sinarmas Telecom (CDMA operator) and Telkom Flexi which is a product line from PT Telkom and now we are at the finalizing discussion towards contract stage with PT Telkom.

**The scope of the project will covers :**

- 1.Site acquisition**
- 2.Tower supply**
- 3.Tower erection**
- 4.Civil and Mechanical Electrical**
